## INTRODUCTION

This document is a companion to the National Electronic Data Interchange Transaction Set Implementation Guide, Health Care Claim: Institutional, ASC X12N 837 dated May 2000 (IG) and the Addenda dated October 2002 (004010X096A1). The 837 IG and Addenda are available from the Washington Publishing Company and may be downloaded from [www.wpc-edi.com/hipaa/](http://www.wpc-edi.com/hipaa/).

DMAS intends that this clarification document be used in conjunction with the IG and Addenda, which contain all of the Health Insurance Portability and Accountability Act (HIPAA) transaction and code set requirements. This document supplements the IG and Addenda with data clarifications that are authorized under HIPAA. It is provided to clarify situations where the IG is not specific and to help the MCO understand how DMAS will be using the inbound 837 transactions and its data elements in the Virginia Medicaid Management Information System (VaMMIS).

## PURPOSE

The purpose of this clarification is to outline DMAS's specific requirements with respect to the 837 data loops, segments, and elements for encounter data. The goal is to facilitate the contracted MCO's understanding of DMAS's data needs.

Facility claims and encounter data submitted to DMAS using the 837 transactions should follow the Provider-to-Provider-to-Payer COB data model referenced in the IG (see page 15 of the guide for information about this model). This model contains loops, segments, and data elements that provide information necessary for DMAS's MMIS and decision support systems.

Page numbers on the following data-clarification matrix refer to the page number in the IG on which the data element appears. Page numbers that begin with "A" are Addenda page numbers. Page numbers that begin with "B" are from Appendix B of the IG, EDI Control Directory.

**All data elements that are used by the VaMMIS are listed on the following matrix.** The matrix does **not** include all data elements that are required by the IG and those must be coded according to instructions in the IG. The instructions here are not intended to override instructions or requirements contained in the IG; they are provided to clarify DMAS's expectations with respect to the various data elements within the 837 transaction where interpretation is possible.

Not all data elements that are indicated as used on the following matrix are required in every situation. Some of the data elements indicated as used are required only when a specific situation is present. For example, inpatient facility claims require an admission date and hour; it is not required on outpatient facility claims. Likewise, outpatient facility claims require a HCPCS procedure at the service line level if available, but these are not coded for inpatient facility services.

If the MCO is submitting both claims to be paid by DMAS and encounters for services rendered and paid under DMAS's capitation agreement with the MCO, these must be submitted in separate ISA-IEA envelopes.

## **REQUIRED ENCOUNTER DATA**

All encounters processed by the MCO or any MCO subcontracted vendor should be submitted to DMAS in the prescribed format, including records that were denied for most reasons.

The exceptions, which should NOT be submitted to DMAS, are:

- Encounters that are rejected by the MCO
- Encounters that are duplicates of records previously submitted by the provider
- Encounters that contain an invalid Medicaid recipient identifier
- Encounters for Medicaid recipients who are not enrolled with your MCO

If the encounter being submitted is one that you have denied, the encounter should be submitted to DMAS with the appropriate denial reason code from the Adjustment Reason Code set (code source 139) appearing in the first CAS segment of the encounter.

## **ADJUSTMENTS and VOIDS**

When submitting adjustment or void records, please ensure the adjusted or void record conform to the following requirements:

1. If the record to which the adjustment applies was not previously submitted to VaMMIS, the original record must precede the adjustment record in the file containing the adjustment record. In other words, you can submit an original and adjustment record in the same file as long as the original record precedes the adjustment record.
2. Your claim number on the original record must be coded in Loop 2300, REF segment (page 180 of IG), REF02 – Original Reference Number. If this number does not match a number in the DMAS system, the adjustment or void record will be assigned a fatal error code.
3. If you are adjusting or voiding one service line on a claim that has more than one line, you must adjust or void all lines. The order in which the service lines appear on an adjusted or voided claim must be the same as on the original claim.

## **NATIONAL PROVIDER IDENTIFIER**

The final rule on National Provider Identifiers (NPI) became effective on May 23, 2008. The final rule specifies that a covered provider must use its assigned NPI where called for on all HIPAA-specified electronic transactions exchanged between covered entities beginning on May 23, 2008.

For providers that are not considered health care providers and cannot obtain an NPI (such as taxi drivers), DMAS is developing a plan to provide those providers with a ten-digit ID that will mimic the NPI. This ID is referred to as an API, atypical provider identification.

## **DMAS DOCUMENTATION**

To further assist MCOs in the encounter data submission process, DMAS is providing other information that MCOs should review. These documents include:

- EDI Submission Manuals at <https://www.viriniamedicaid.dmas.virginia.gov/wps/portal/EDIFormsLinks>
- Companion Guides at <https://www.viriniamedicaid.dmas.virginia.gov/wps/portal/EDICompanionGuides>
- Encounter Data Submission Manual at <http://www.dmas.virginia.gov/mc-encounter.htm>

The Companion Guides are not specific to encounter data, but may contain helpful information not found in the Data Clarifications or this Encounter Data Submission Manual.
